SKIES BRIGHT.

During the past week we passe through the townships of Hanover and Green, in the south part of this county, and had the pleasure of taking by the hand many of the sterling Democrats of that region. "Old South Carolina" is up in arms, ready for the enemy, and if any stray Fusionist should happen to visit Green, he will not find any of the Democracy there "green" enough to bite at any of his bates. They want no instructions from any quarter as to how they shall vote, believing themselves years past, has been grouty because the fully competent to do their own thinking. Our word for it, the townships of this county will be larger than usual. Many old-line, National Whigs, refuse to join in with the Fusion coalition, to degrade the once powerful and national Whig party into a mere "thereby hangs a tale!" sectional party, formed solely to help a few office seekers into "place and power." Let every Democrat make this contest part and parcel of his own business, and go to work as if success depended upon his exertions alone. Let us administer a rebuke to Whiggery and the traitors to Democracy, that they will long remember. These traitors will discover, when too late to save themselves, that they have only thrown themselves into the embraces of Whiggery, and the Whig leaders who now tickle their ears with flattering words, once in power, will turn from them with digust and despise the hands that feed them !

NEW YORK POLITICS.

Judge Bronson, of New York, has een nominated by the Hards for Governor of that State. He expresses him self strongly in favor of delivering up fugitive slaves, and thinks the law should be faithfully executed. On the "question at issue." as the Fusionists say, he is "decidedly in favor of allowing erable trouble because we did not publishe people of every State and Territory matters into the halls of Congress, where

FRIEND SHERIDAN :- Thinking that a few lines from this section of the country might not come amiss to your numerous readers, here goes from the Prairie State, or, as it is sometimes called, the Garden State, of Illinois.

I arrived at the pleasant little village of Genesseo last Thursday, by the Rock Island Rail Road, eight hours from the time I left Chicago, a distance of two ford of Wayne, and L. D. State you can see nothing but the broad. rolling prairies, extending out on every side as far as the eye can reach. These are covered with waving fields of corn and golden grain, and dotted here and there with neat, tasty farm houses, surrounded with shrubbery of from one to two years growth, giving the whole the appearance of an old, well-farmed country. From the window where we now

esting section to Ashland men, and, consequently, I will give you some description of the country, soil, &c. The soil is about three feet deep, and consists of a black loam or muck, which is the result of the decomposition, for centuries, of the vegetable products of the prairies. The strength of the soil seems almost inexhaustable. As an illustration, we vesterday visited a field in this vicinity, upon which has been raised seventeen successive crops of corn without manuring the ground. The crop for the present year will average fifty bushels of shelled corn to the acre, which is the smallest yield during the seventeen years. labors, the employees of Uncle Sam, at This statement may take some of our the Brooklyn Navy Yard, have accom- Ashland County farmers by surprise, but plished something.
